

Ziad Wael Khedr

AI Engineer

ziadwael182007@gmail.com | 6th of October, Giza, Egypt | [linkedin/ziadkhedr](https://www.linkedin.com/in/ziadkhedr)

OBJECTIVE

AI Engineer with hands-on freelance experience building production automation workflows on Upwork, Khamsat, and Mostaq. Combines practical expertise in n8n pipeline orchestration, LLM API integration, and RAG systems with a systems and logic design background as an Electronics & Communication Engineering student. Looking to apply automation and problem-solving skills to build scalable, intelligent systems.

EDUCATION

Bachelor of Electronics & Communication Engineering 2025 – 2029

Arab Academy for Science, Technology & Maritime Transport

GPA: 3.89

EXPERIENCE

Intern, League of Arab States — Sustainable Development Sector Cairo, Egypt

- Training covered the League's structure, sectors, regional role, and institutional work.
- Worked with the **Sustainable Development Sector** on youth-focused digital initiatives, including a platform for volunteering opportunities, scholarships, and information about the League.
- Conducted a **technical feasibility study** for an Arabic language proficiency assessment platform inspired by IELTS/TOEFL.
- Participated in the **Arab-Chinese Youth Forum on AI**, focusing on AI's role in communication and international cooperation.

Low Current Systems Trainee — Savills Cairo, Egypt

- Learned CCTV systems fundamentals and worked hands-on with access control systems.
- Studied structured cabling concepts, fire alarm system components, and core networking fundamentals.

FREELANCE AUTOMATION PROJECTS

Real Estate Lead Qualification Automation

- Developed an AI chatbot for real estate lead qualification and customer management, reducing repetitive manual triage work through automation.
- Designed an automated scoring system that analyzed customer responses and assigned lead scores. [add: how many leads processed, or accuracy/consistency vs. manual scoring]
- Built automated meeting scheduling for qualified leads and stored customer data automatically via Google Sheets.
- Connected APIs, calendars, and AI-based workflows using n8n.

AI RAG Assistant for Computer Store

- Developed an AI-powered RAG assistant to automate customer support and reduce repetitive inquiries for a computer store, using n8n.
- Built a semantic search system using embedding models over the store's product data.
- Enabled the assistant to recommend PC builds based on available parts and live pricing data.
- Automated lead capture by sending customer phone numbers to Telegram when purchase intent was detected. [add: response time improvement or inquiry volume handled]

AI Restaurant Ordering & Management System

- Built a full chatbot-based ordering and management system for a restaurant using n8n.
- Enabled order creation, cancellation, tracking, and reservation management end-to-end.
- Built an FAQ system covering restaurant policies (location, menu, availability, pet policy, etc.).

- Integrated delivery workflow status updates into the order-tracking flow. [add: order volume handled or time saved vs. manual ordering]

SKILLS

Technical Skills

- Workflow Automation (n8n)
- LLM Integration & Prompt Engineering
- RAG Systems & Vector Embeddings
- Chatbot Development
- Programming: C++ and Python

Soft Skills

- Problem solving
- Teamwork
- Time management
- Adaptability

COURSES

AI Automation using n8n — Digital Egypt Pioneers

- Learned workflow automation concepts using APIs and webhooks; built automation systems using n8n.
- Worked with chatbot workflows and AI integrations, including Telegram and spreadsheet integrations.

Microsoft Excel for Data Analysis — lukebarousse

- Excel formulas & functions, dashboards & data visualization, Power Query & Power Pivot, basic DAX.

LANGUAGES

- Arabic – native
- English – fluent
